

Hello, my name is Michael Robertson and I started with Supportive Housing for Families in March 2019 with my son, Keith, who was two years old. My one-year-old daughter, Aubrey, was living with her mother at that time. I started with very little and with the help of the program I was given a huge head start in getting back on my feet to be where I should be in life. I lost all my belongings that I had in storage and the program replaced everything. My Case Manager, Naquia, has been a huge help in helping me to stay on track. Since entering the program, I became a dad again.

Both my daughter, who is three now, and my one-year-old son, Alexander, came to live with me permanently. The program gave me and my children a place to call home and provided stability at a time when it was really needed. I am so glad I had the opportunity to use the program to my advantage. Of all the programs I've participated in, Supportive Housing for Families was the most beneficial. For people who want to change their lives, this program is a huge help. Anyone can benefit if they stick with this program. Without SHF, I definitely would not be where I am, and I appreciate everything. I couldn't be more grateful. Now I have a place to call my own with my three children. I want to thank the Legislators for all the support you've provided to the program.
